Bachelor of Technology, Information Technology
Thangavelu Engineering College, Chennai 2022 – 2026
CGPA: 8.2

PROFESSIONAL PROJECTS

- **Invoice Automation:** Full-stack invoice management system using React.js, Flask, MySQL, LLM, JWT, Google/Microsoft OAuth, and currency conversion (USD, INR, SGD) via REST APIs.
- **Email Automation:** AI-powered email platform that ingests Outlook mailboxes via Graph API and auto-classifies emails using LLM-driven triage.
- **Audio Transcription Dashboard:** Template-driven business dashboard with dynamic charts, analytics, real-time metrics, and Admin/Super Admin management using React.js, Flask, and REST APIs.
- **Ragsuit Dashboard:** Interactive business dashboard with dynamic charts, analytics, real-time metrics, and Admin/Super Admin management using React.js, Flask, and REST APIs.
- **Task Planner:** Task management app with CRUD operations, user-friendly interface, and API integration.
- **Food Ordering Web App (Full Stack):** Backend functionality using Spring Boot, JavaScript, SQL, including Add-to-Cart operations and OTP-based user signup.
- **SkillSwap Skill Exchanging Platform (Final Year Project):** Full-stack skill exchange platform with React.js, Spring Boot REST APIs, and PostgreSQL for authentication, matching, and chat.
- **Blinkit Clone** Developed a responsive front-end clone of the Blinkit grocery website using HTML and CSS.
